SYNOPSIS

Ander is an intimate story wich portrays a Basque countryman well into his forties at the turn of the twentieth century.

He lives a monotonous life that takes place between his work in a bicycle factory and his peasant duties shared with his sister and their elder mother.

His life starts to change when due to an accident; he needs to hire a Peruan helper, José.

The newcomer's presence alters unintentionally the relationships between "Ander", his relatives and acquaintances.

When Ander acknowledges that he is developing deep feelings towards José, he has to decide whether he will transform his life to include him or not.
